Lithuanian Building Sustainability Assessment System (LBSAS) aims to objectively and transparently assess the level of sustainability of territories and buildings in Lithuania and to publicly declare the best sustainable design and construction practices.

**Advantages of LBSAS:**
- Encourages the design and construction of healthy, comfortable, long-lasting, cost-effective, energy-efficient buildings that rationally use natural resources at all stages of the life-cycle of the building;
- Developed by the experts of the Lithuanian Green Building Council in accordance with internationally recognized assessment methodologies and best practices;
- Adapted specifically to Lithuania, taking into account natural conditions, legal environment and local market needs.

**Why certify?**
- Comprehensive assessment based on 8 sustainability categories
- Complex guide for designing and constructing sustainable buildings
- Objective buildings’ sustainability comparison
- Assessment of environmental performance
- Promotion of innovations in the construction

**ASSESSED BUILDINGS (NEW CONSTRUCTION)**
- Residential (multiple flat) buildings
- Administrative (office) buildings
- Commercial and recreational buildings
- Industrial (manufacturing, logistics, storage) buildings

**LBSAS IS BASED ON 8 SUSTAINABILITY CATEGORIES AND 29 CRITERIA**
- Health and wellbeing: 17.9%
- Energy: 26.8%
- Transport and mobility: 10.7%
- Site selection and ecology: 8.9%
- Construction materials: 8.9%
- Waste disposal and recycling: 12.5%
- Project management: 5.4%
- Water treatment: 8.9%

**THE BENEFITS OF THE GREEN BUILDING**
- Healthy microclimate inside the premises
- More valuable property and higher occupancy rates
- Better image of the company, increased competitive advantage
- Socially responsible business
- Reduced energy consumption and exploitation costs
- Lower CO2 emission and environmental impact
- Use of advanced technologies, life cycle thinking
- Increased productivity and satisfaction of employees

**CREATING SUSTAINABLE ENVIRONMENT**
Assessing your building according to LBSAS is the best way to present the benefits of your green building to existing and future customers, to your employees and partners. Join the innovative, smart and responsible community in creating friendly built environment for people and nature!
